WINDOW STYLES

### Flush Casement

Flush-fit high-performance windows available in top hung, side hung or fully-reversible configuration. Traditional timber aesthetics make them ideal for renovation projects and conservation areas, while foul weather resistance to PAS23 and PAS24-rated enhanced security offer outstanding performance.

West Port Flush cCasement comes with a one piece espagnolette system and night vents as standard, and all models feature key-locking handles. In addition, the products are fully compliant with the police-backed Secured by Design initiative, as well as the latest fire and environmental regulations.

#### Timber

We use sustainable and responsibly sourced softwood and laminated softwood as standard or can provide hardwood quotes on request.

#### Design

We offer a range of different bar types including Georgian Insert Bars, Plant-On Astragals and Solid Glazing Bars. Trickle Vents, Cill extensions and bespoke designs available.

## Stormproof Casement

Not just stunning to look at but also extremely robust, our Stormproof Casement was specifically designed and engineered to meet exacting Secured by Design standards.

These high performance windows are available in top hung and side hung options and offer resistance to foul weather to PAS23. All models feature key locking handles.

### Timber

We use sustainable and responsibly sourced softwood and laminated softwood as standard or can provide hardwood quotes on request.

### Design

We offer a range of different bar types including Georgian Insert Bars, Plant-On Astragals and Solid Glazing Bars. Trickle Vents, Cill extensions and bespoke designs available.

## Sliding Sash With Spiral Balances

The modern functionality of a Sliding Sash Spiral Balance window is a great choice for conservation buildings. With the spiral balances mechanism the sashes will operate smoothly for an easy opening. Our spiral balance models, like the cords and weights, are delivered factory-finished and fully glazed, and are an ideal choice for projects in conservation areas.

As well as offering a slender jamb profile compared to the Cords and Weights the Spiral Balance is also available in a 140mm small and 170mm large box sections. (170mm is the standard size)

### Timber

We use sustainable and responsibly sourced softwood as standard or can provide hardwood quotes on request.

### Design

We offer a range of different bar types including Georgian Insert Bars, Plant-On Astragals and Solid Glazing Bars. Trickle vents, cill extensions, decorative horn options and bespoke designs available.

## Sliding Sash With Cords & Weights

Using pendulum-style cords and weights, these outstanding sash windows are extremely easy to operate. Durable nylon cords and pulleys ensure a long, reliable service life.

Using pulley-style cords and weights, they can be customised with a range of mouldings and fenestrations to achieve various styles. With a large choice of horn styles available, finding the right detail to complement your windows for the area couldn't be easier.

Traditional aesthetics make the product an excellent choice for conservation areas, and a choice of contemporary or traditional hardware is available. Available in a 140mm small and 170mm large box sections. (170mm is the standard size).

We use sustainable and responsibly sourced softwood as standard or can provide hardwood quotes on request.

### Design

We offer a range of different bar types including Georgian Insert Bars, Plant-On Astragals and Solid Glazing Bars. Decorative Horns options available. Trickle vents, cill extensions, decorative horn options and bespoke designs available.

## Tilt & Slide Windows

This ingenious vertical-sliding sash design offers top of the range performance within a highly traditional stepped sash and frame design. Its historic aesthetics make it a great choice for sensitive areas.

A unique track tilting mechanism allows for safe, easy cleaning of external glass surfaces from the inside of the building, great for high raised buildings where access to the outside of the window is difficult. The product offers foul weather performance to BS6375 Parts 1 and 2, and optional safety restrictor bolts.

We offer a range of different bar types including Georgian Insert Bars, Plant-On Astragals and Solid Glazing Bars. Trickle vents, cill extensions, decorative horn options and bespoke designs available.

### Security

Optional Secured By Design (SBD) approved specifications available on request.

### Ironmongery

With an extensive choice of traditional and contemporary hardware options, we can make a West Port window suitable for virtually any style of project or property.

Secured by Design

Police Preferred Specification

We have a fully automated paint line for volume production and a manual paint facility for smaller orders or bespoke projects.

### Your Choice Of Finish

We have our own highly advanced paint mixing facility. By taking samples of a desired colour, then running it through a spectrometer, the device can replicate it. We can supply windows and doors in any of the standard RAL colours, and our paint mixing facility can produce 50,000 colour variations.

We can even supply factory finished dual colour windows and doors, with one colour on the outside and another colour internally – or natural timber – on the inside.

More stains are available upon request.

The colour samples shown are for illustrative purposes only and may differ from the original colour. For best results always use an approved colour swatch for accuracy.
